Multi threading 1-

Thread ?

Process ?

Code → Prime no. Code C++

.txt → (.cpp)

→ Compile

→ executable

.exe → windows

exe → double click → process

Process → program under execution

Thread \rightarrow Light weight process:

\rightarrow Independently executes!
 \rightarrow

Example

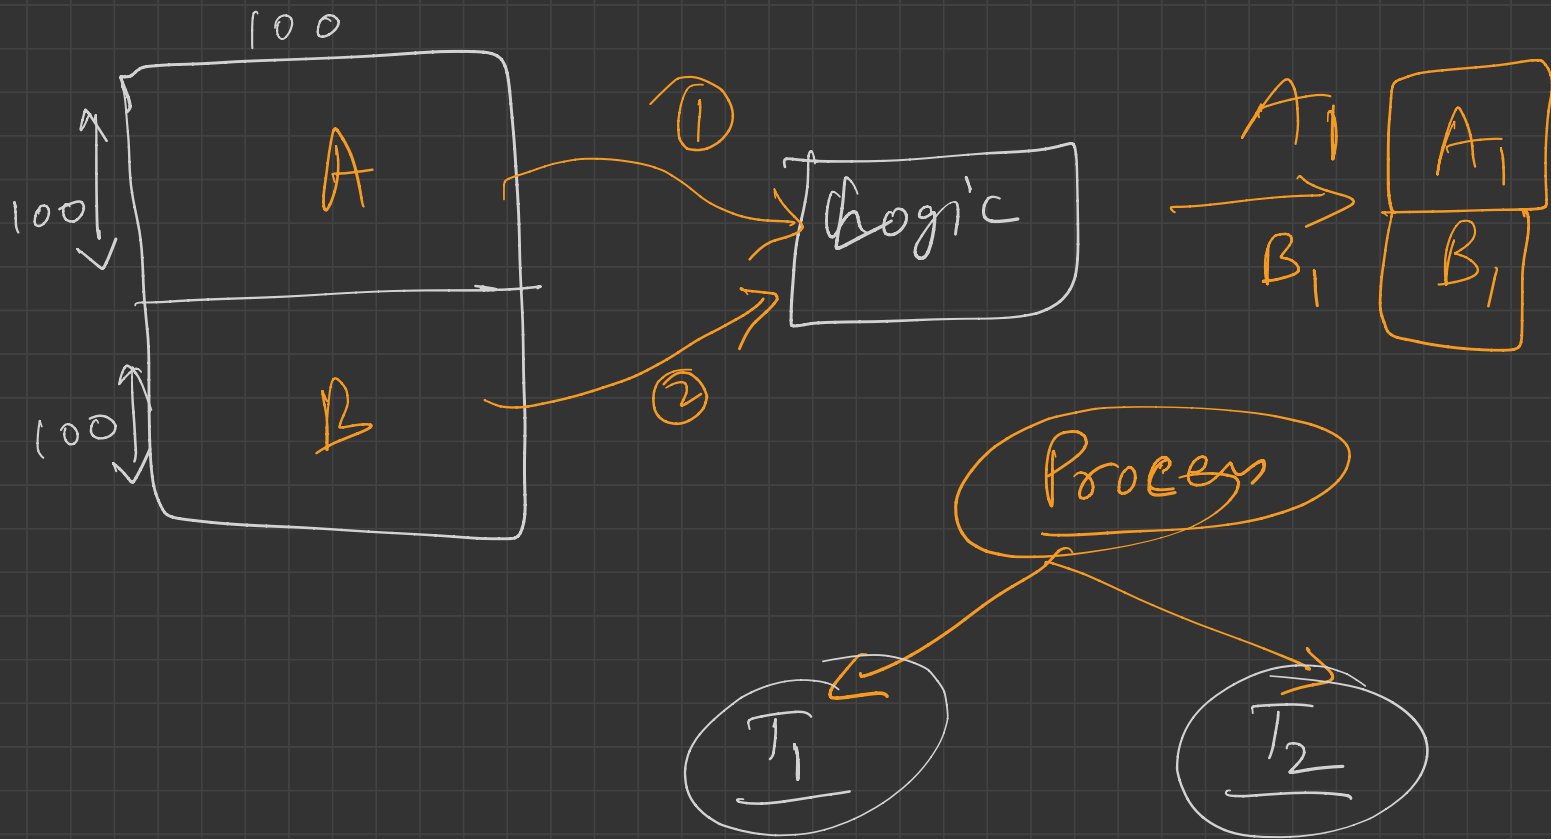

JPG \rightarrow PNG

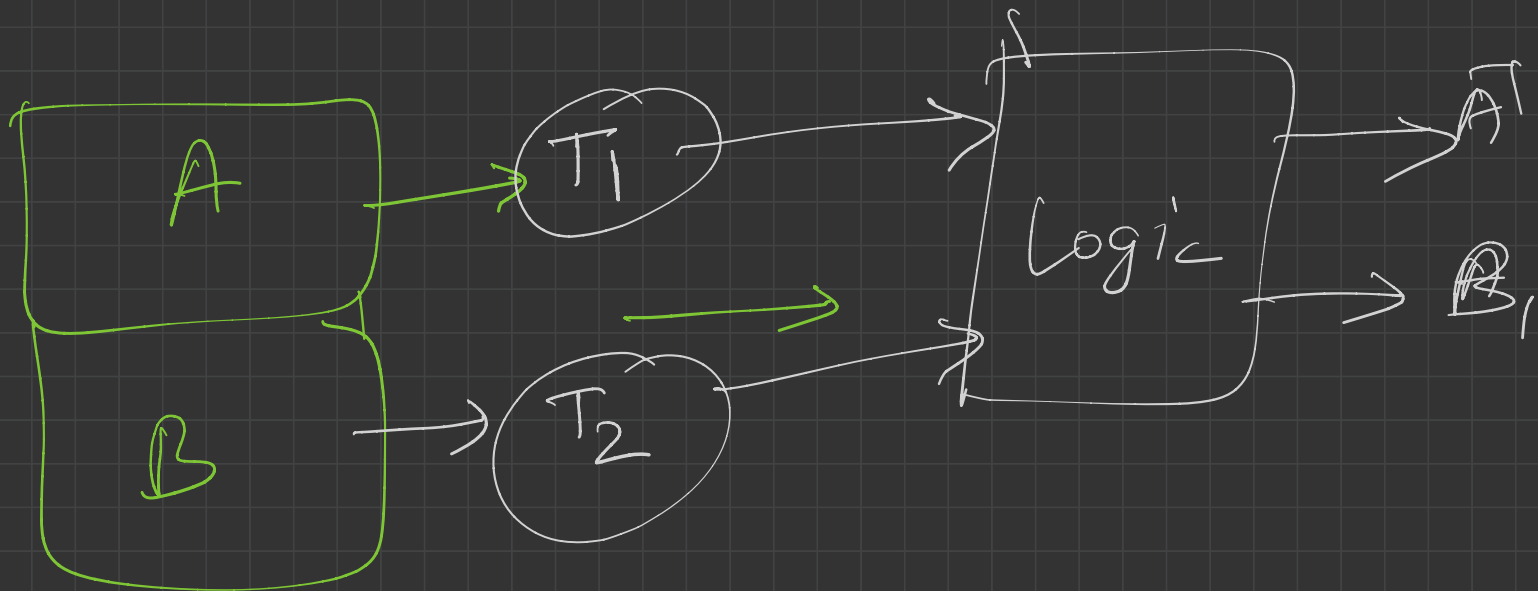

\rightarrow Input \rightarrow Image File.

100 X 200
W H

① Sequentially \rightarrow

Multi tasking

- ① More than 1 processes
Concept
- ② Isolation & Memory protection

- ③ Process schedule.

Multi threading

- ① More than 1 threads.
- ② Not isolation & Memory protection.

- ③ Threads schedule.
